Digital Parking Permit System

Functional Requirements

1. Students and staff can register vehicles
2. Request parking permits
3. Check available parking zones
4. Report parking issues

Non-functional Requirements

1. Parking system should work without any interruptions - 24/7
2. A reliable and fast coding language supposed to be used to make it as fast as possible

Test Case Table

Test Case Table has been made to track properly track the tests. It has:

- 2 system test cases
- 2 acceptance test cases
- 2 regression test cases

And it checks the complete integrated system, and acceptance testing checks whether the system meets user or business expectations.

Defect Analysis

“A valid parking permit is shown as expired during security verification.”

Item	Student Answer
Defect category	Software error
Severity	Maximum
Priority	Highest

Possible root cause	Problems in data-base
Regression test	Find this specific permit in data-base; check whether the expiration date matches.
